**Multi Criteria Analysis in the Renewable Energy Industry (Green Energy and Technology)** José Ramón San Cristóbal

Decision makers in the Renewable Energy sector face an increasingly complex social, economic, technological, and environmental scenario in their decision process. Different groups of decision-makers become involved in the process, each group bringing along different criteria therefore, policy formulation for fossil fuel substitution by Renewable Energies must be addressed in a multi-criteria context. *Multi Criteria Analysis in the Renewable Energy Industry* is a direct response to the increasing interest in the Renewable Energy industry which can be seen as an important remedy to many environmental problems that the world faces today. The multiplicity of criteria and the increasingly complex social, economic, technological, and environmental scenario makes multi-criteria analysis a valuable tool in the decision-making process for fossil fuel substitution.

The detailed chapters explore the use of the Multi-criteria decision-making methods and how they provide valuable assistance in reaching equitable and acceptable solutions in the selection of renewable energy projects. Common multi-criteria decision-making methods including Analytical Hierarchy Process, PROMETHEE, ELECTRE, TOPSIS and VIKOR are explored in detail with an application case of each method included at the end of each chapter. As such, *Multi Criteria Analysis in the Renewable Energy Industry* is an ideal resource for those groups of individuals, institutions and administration such as local authorities, academic institutions, environmental groups, and governments that, through their priorities and evaluation systems, have interests at stake and directly or indirectly influence the decision-making process.

### **From reader reviews:**

#### **Clyde Welch:**

Have you spare time for the day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a walk, shopping, or went to often the Mall. How about open or even read a book allowed Multi Criteria Analysis in the Renewable Energy Industry (Green Energy and Technology)? Maybe it is being best activity for you. You understand beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have additional opinion?

#### **Jim Martin:**

As people who live in the particular modest era should be up-date about what going on or info even knowledge to make them keep up with the era that is certainly always change and progress. Some of you maybe may update themselves by reading through books. It is a good choice in your case but the problems coming to an individual is you don't know what kind you should start with. This Multi Criteria Analysis in the Renewable Energy Industry (Green Energy and Technology) is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

#### **Jordan Moore:**

Do you considered one of people who can't read pleasurable if the sentence chained within the straightway, hold on guys that aren't like that. This Multi Criteria Analysis in the Renewable Energy Industry (Green Energy and Technology) book is readable simply by you who hate the straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to provide to you. The writer associated with Multi Criteria Analysis in the Renewable Energy Industry (Green Energy and Technology) content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the content but it just different in the form of it. So , do you nonetheless thinking Multi Criteria Analysis in the Renewable Energy Industry (Green Energy and Technology) is not loveable to be your top record reading book?

#### **John Razo:**

As a university student exactly feel bored in order to reading. If their teacher questioned them to go to the library in order to make summary for some guide, they are complained. Just minor students that has reading's heart or real their interest. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that reading through is not important, boring as well as can't see colorful pics on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Multi Criteria Analysis in the Renewable Energy Industry (Green Energy and Technology) can make you feel more interested to read.
