**The Euro, The Dollar and the Global Financial Crisis: Currency challenges seen from emerging markets (RIPE Series in Global Political Economy)** Miguel Otero-Iglesias

This book analyses how financial elites in key dollar-holding emerging markets perceive the contest between the euro and the dollar for global currency status. It also assesses how far the Eurozone has gone in challenging US hegemony in monetary affairs through the prism of these elites.

Drawing on Chartalist and Constructivist theories of money, the author provides a systematic approach to studying global currency dynamics and presents extensive original empirical data on financial elites in China, Saudi Arabia, the UAE and Brazil. The author demonstrates, amongst other things, how the gradual ascendance of a structurally flawed currency like the euro has highlighted the weaknesses of the dollar and how the euro has demonstrated that sovereignty sharing in monetary affairs is possible and that the international monetary system can be a multicurrency and multilateral system.

In this highly innovative and important book, Otero-Iglesias shows the importance of studying financial elites in Brazil, China and the GCC countries in order to understand the full impact, material and ideational, of the euro in the transformation of the IMS. It will be vital reading for students and scholars of International Political Economy, International Economics, International Finance, Economic History, Economic Sociology, International Relations, Comparative Political Economy and Comparative Politics.
