Dictionary of Soil Bioengineering Wörterbuch Ingenieurbiologie: English/Deutsch/Français/Italiano (German Edition) Matthias Oplatka, Matthias Dietz, Yves Leuzinger, Les Reussilles, Fabio Palmeri, Lorenzo Dibona, Pierre-André Frossard

To date the use of vegetation for the protection and rehabilitation of land is being demonstrated by a few far-sighted individuals. These individuals have recognised the need to consider cost-effective and environmentally friendly techniques. As this group grows in numbers, interest in soil bioengineering is developing, standards are being raised and ideas are being exchanged. Soil bioengineering unites a number of professionals with civil engineering, geomorphology, planning, forestry and horticultural skills. These professionals have the common aim of designing and implementing a quality solution to a specific problem. This multi-disciplinary synergy of ideas and approaches to solving problems can be an exciting and dynamic way to work; the players bring their own methodologies, bases and views of the problem. Innovative solutions often stem from a knowledge and respect for older labour-intensive technologies. Such skills have, in recent decades, been undervalued and sometimes forgotten. Soil bioengineering offers a chance to revive some of those skills and combine what is best of our modern technologies with a respect for indigenous and sustainable forms of land care."
