Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science) Albert Ting-pat So, Wai Lok Chan

Intelligent building is the future of our building industry; all commercial, residential, industrial and institutional buildings will be designed towards the goal of 'intelligent buildings'. The most important aspect of an intelligent building is the building systems, such as electrical services, heating, ventilation and air-conditioning systems, vertical transportation systems, and life safety systems, which must operate intelligently and efficiently to enhance the activities of the occupants. *Intelligent Building Systems* explains what already exists in a modern intelligent building and describes what is currently being developed by researchers to improve human comfort, working efficiency and energy performance for buildings in the 21st century.

Intelligent Building Systems is divided into three parts. The first part gives a quick review of the structure, terminology, layout and operating principles of most standard modern building systems. The second part introduces the background material necessary to understand intelligent building systems, including information on electronics technology, fundamental mathematics, and techniques in artificial intelligence and signal processing. These first two parts are the foundation for the final part, which consists of research works carried out by the authors and other researchers in the application of artificial intelligence to building systems. The technologies presented will encourage readers to envision new and innovative ideas on possible future applications.

Intelligent Building Systems is relevant to practitioners and researchers in the area of architectural science and engineering, electrical and mechanical services and intelligent buildings. It may also be used as a text for advanced courses on the topic.

From reader reviews:

Stanley Kamp:

Now a day people who Living in the era exactly where everything reachable by talk with the internet and the resources inside can be true or not need people to be aware of each details they get. How people have to be smart in having any information nowadays? Of course the solution is reading a book. Reading a book can help men and women out of this uncertainty Information especially this Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science) book since this book offers you rich info and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it you may already know.

Kurt Rose:

Typically the book Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science) will bring you to definitely the new experience of reading a book. The author style to describe the idea is very unique. When you try to find new book to study, this book very appropriate to you. The book Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science) is much recommended to you to learn. You can also get the e-book through the official web site, so you can quicker to read the book.

Rayford Alexander:

The reserve untitled Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science) is the publication that recommended to you to study. You can see the quality of the guide content that will be shown to anyone. The language that creator use to explained their way of doing something is easily to understand. The author was did a lot of analysis when write the book, hence the information that they share for you is absolutely accurate. You also might get the e-book of Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science) from the publisher to make you more enjoy free time.

Kenneth Armstrong:

Book is one of source of expertise. We can add our information from it. Not only for students but additionally native or citizen will need book to know the update information of year to be able to year. As we know those ebooks have many advantages. Beside many of us add our knowledge, could also bring us to around the world. By book Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science) we can acquire more advantage. Don't you to be creative people? To become creative person must want to read a book. Just simply choose the best book that acceptable with your aim. Don't always be doubt to change your life at this book Intelligent Building Systems (The International Series on Asian Studies in Computer and Information Science). You can more appealing than now.
