Neo4j Graph Data Modeling Mahesh Lal

Design efficient and flexible databases by optimizing the power of Neo4j

About This Book

- Model your data as a graph using Neo4j to design databases with minimum hassle
- Discover new patterns using graphs and solve problems that are difficult to solve using any other database
- Step-by-step guide to designing a graph model with pitfalls and design choices

Who This Book Is For

If you are a developer who wants to understand the fundamentals of modeling data in Neo4j and how it can be used to model full-fledged applications, then this book is for you. Some understanding of domain modeling may be advantageous but is not essential.

What You Will Learn

- Translate a problem domain from a whiteboard to your database
- Make design decisions based on the nature of data and how it is going to be used
- Use Cypher to create and query data
- Evolve your database in stages
- Optimize the performance of your application with data design
- Design paradigms to ensure flexibility, ease of querying, and performance
- Move from an existing model to a new model without losing consistency

In Detail

Neo4j is a graph database that allows you to model your data as a graph and find solutions to complex real-world problems that are difficult to solve using any other type of database.

This book is designed to help you understand the intricacies of modeling a graph for any domain.

The book starts with an example of a graph problem and then introduces you to modeling non-graph problems using Neo4j. Concepts such as the evolution of your database, chains, access control, and recommendations are addressed, along with examples and are modeled in a graph. Throughout the book, you will discover design choices and trade-offs, and understand how and when to use them. By the end of the book, you will be able to effectively use Neo4j to model your database for efficiency and flexibility.

From reader reviews:

Kathleen Land:

What do you think about book? It is just for students since they're still students or the item for all people in the world, what the best subject for that? Just you can be answered for that problem above. Every person has several personality and hobby for every other. Don't to be pressured someone or something that they don't wish do that. You must know how great in addition to important the book Neo4j Graph Data Modeling. All type of book is it possible to see on many options. You can look for the internet options or other social media.

Susan Williams:

The book with title Neo4j Graph Data Modeling has lot of information that you can find out it. You can get a lot of advantage after read this book. This kind of book exist new understanding the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This specific book will bring you inside new era of the glowbal growth. You can read the e-book on the smart phone, so you can read the item anywhere you want.

Cathy Duran:

Do you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't ascertain book by its deal with may doesn't work here is difficult job because you are frightened that the inside maybe not as fantastic as in the outside look likes. Maybe you answer is usually Neo4j Graph Data Modeling why because the great cover that make you consider about the content will not disappoint a person. The inside or content is fantastic as the outside as well as cover. Your reading sixth sense will directly assist you to pick up this book.

Mildred Kershner:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library or make summary for some reserve, they are complained. Just small students that has reading's soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Neo4j Graph Data Modeling can make you really feel more interested to read.
